

FLORIDA INJECTION DIESEL WARRANTY POLICY

1. FUEL INJECTOR OR PUMP TESTING AND CLEANING

- A) Testing and cleaning is done to document the condition of the item at that moment.
- B) There are no refunds for the injector(s)/pump going bad post test and clean. We document condition, not warrant continued acceptable operation.
- C) The warranty terms are that we will retest them once within 60 days at no charge if you believe you have a bad injector or pump. If they are found defective, we can sell you replacements at additional cost.

2. FUEL INJECTOR OR PUMP RE-MANUFACTURING (REBUILDING)

- A) Fuel injector or pump re-manufacturing carries a 2 year limited warranty.
- B) This warranty is not mileage based.
- C) All sales are final.
- D) We are the sole arbiter in determining condition of parts.
- E) We will, within 2 years of the sale date, inspect and replace if necessary, any parts we sold you that are defective.
- F) This is done on a prorated basis as follows:
 - a) Within one year of the sale date, we will test and replace any defective item at no additional charge.
 - b) In the second warranty year, we will test and replace any defective item on a prorated basis, IE, 12/12 of selling cost in the first month of the second year down to 1/12 in the last month.
- G) Exclusions to the warranty are fuel quality issues and improper installation.
- H) The only items covered under this warranty are the actual parts we sold you.
- I) Mechanical labor costs are not covered by the warranty.
- J) Ancillary costs are not covered by the warranty.

We have very few issues with parts we sell. This is why we feel comfortable in having a two year warranty in place for our re-manufactured parts.

The best thing you can do to extend the life of your diesel fuel system parts is to add a lubricant to your fuel as follows:

- ✓ Use Stanadyne products in your fuel such as Stanadyne Diesel Lubricity Formula
- ✓ Alternately use GM ATF. One half Qt per small tank fill up or 1 Qt large tank fill up is good.
